

Tazita Coffee Shop by Joceline Garcia & Jeniffer Vasquez

Tazita Coffee Shop is a family owned business, offering the best handcrafted beverages. Tazita Coffee Shop offers a selection of globally sourced blends including a Medium and Dark Roast Coffee as well as a Dark Roast Espresso. In addition to classic coffee beverages like the latte, cold brew, Tazita's menu includes specialty drinks and teas.

Our business is committed to bring smiles to our customers' faces from the second they walk in. All our drinks are made with love, patience and meticulous attention to detail. Upholding our philosophy to be part of the neighborhood and give back to our community we donate a percentage of our earnings to a local charity.

We offer:

- HOT COFFEE
- COLD BREWS
- ESPRESSO
- SPECIALTY DRINKS
- TEAS

1. Lines 2-8 in styles.css set up variables with values that can be called later on by the css file using var().
2. Lines 29-35 on the index.html file are the header class portion. This class was created to place the background image, and input the name of the business, along with a brief slogan for Tazita Coffee Shop.
3. Lines 56-64 are our menu options, they display the different drinks offered at our coffee shop along with a picture and the price of each item.
4. One of the challenges we had was running our website locally with the help of node.js. To fix this we had to add “`app.listen(port, => console.info(`Listening on port ${port}`))`” which allowed us to view the site on localhost:3000.

5. Another challenge we faced was having the site open the different html files which we fixed by using “`app.get " req res => res.sendFile __dirname + '/views/index.html'`”
